

Introducing the Mini-Ticker for Cats!

Each click equals 0.05 ml
of medication

Two clicks equal 0.1 ml

0.05ML IS
APPROXIMATELY THE SIZE
OF THIS DOT- ●

The Mini-Ticker is a device that you can use to accurately and easily apply creams and ointments to your pet.

Use the following instructions to get the most benefit from your medications:

1. Remove the cap by placing your thumb under the tab and push upward. Do not throw the cap away.
2. **Rotate the dial located at the bottom of the Ticker clockwise, counting out the number of clicks instructed on the prescription label.**
3. **There is a delay in the release of the medication. Before applying the medication, wait 20-30 seconds to make sure that the full dose of medication has been released.**
4. Rub the Ticker directly on the area of skin instructed by your provider. Be sure to rub it in very well.
5. Replace the cap by pushing on it until you hear or feel it click.
6. Check to see if the top part of the plunger has reached the word refill as shown in the picture below. If it has, contact us to request a refill.
7. **NOTE: The residual volume left in the container is about 2 grams. Your prescription was filled with at least 2 grams over the amount prescribed by your doctor.**

POP THE LID
CLICK THE DIAL
WAIT FOR MEDICATION TO DISPENSE
APPLY THE MEDICATION

A note on priming the device:

At Pharmacy Solutions, we take measures to make sure your medication is ready to use as soon as you receive it. Occasionally the medication can shift during shipping, requiring you to re-prime the device. If medication doesn't come out of the Ticker on the first click, prime the device by slowly rotating the dial clockwise until a small amount comes out. **NOTE: There is a delay after you click the dial before the drug is dispensed. Please wait 20-30 SECONDS before clicking again.** Wipe it off with a tissue and throw it away. You are now ready to use your Ticker!

Helpful Hints:

- Wash your hands with soap and warm water before and after each use. Do not touch your eyes, mouth, or nose after applying without washing your hands.
- To reduce the risk of accidental exposure to others, use the Ticker to directly apply your medication to the skin.
- Applying with a glove can reduce the risk of accidental exposure to yourself or others. After applying the medication, remove the glove by turning it inside out, without touching your bare skin, and discard it in the trash.
- Keep your medication in a cool, dry area and away from sunlight – unless otherwise instructed. Store your medication and waste (such as gloves and empty devices) in a secure location that is out of reach from pets or small children.
- For more information and videos on how to use the Mini-Ticker, please visit our website at <http://www.pharmacysolutionsonline.com>.

Benefits of using the Mini-Ticker:

- The Mini-Ticker device allows for accurate and precise dosing, with one click providing 0.05 ml of medication. (two clicks provide 0.1 ml) This offers your provider a variety of options to customize your dose to meet your individual needs.
- The unique mechanism provides a click that you can hear, see, and feel with each turn. It's easier for travel too!
- The Mini-Ticker can be used to apply your medication directly to the skin, reducing mess and the risk of accidental exposure to others.
- A refill line on the device reminds you to call us when your refill is due.
